for the results of their study entitled "*Soil Quality, Crop Growth and Productivity across Formulations for Organic Urban Gardening (Square-Foot Gardening)*". The varying soil formulation which they have investigated in their study with different amounts of chicken manure and vermicast have been utilized by the members of the Natid-asan Christian Community Church (NCCC), Inc. to improve the growth and productivity of their vegetables and other organically-grown crops in their square-foot gardens and backyard plots. As their partner community for their extension project on square-foot urban gardening, the members of the community are grateful for their contribution towards better growth and production of food resources for the community.

Given this 24th day of July, 2020 at Natid-asan Christian Community Church, Inc., Casisang, Malaybalay City.
